

01_CLIENT_SERVICE_GUIDE.md — RAFly Digital Growth Service Guide

RAFly Digital Growth

"Your business is our responsibility."

Build · Protect · Grow

1. WELCOME TO RAFly DIGITAL GROWTH

At RAFly, we do not view ourselves as just another vendor. We operate as your dedicated digital systems partner. Whether you need a high-converting web application, urgent cyber security recovery, or an automated lead acquisition engine, our team takes complete ownership of your digital infrastructure.

2. OUR THREE CORE PILLARS

01. BUILD — High-Performance Infrastructure

We build digital platforms engineered for speed, mobile responsiveness, and conversion:

- **Custom Web Applications:** Built with modern PHP, React, and modular architecture. Target fast load times (< 1.5s benchmark) and mobile-first UX.
- **Scalable E-Commerce Storefronts:** Shopify and custom WooCommerce stores designed to reduce cart abandonment and increase average order value (AOV).

02. PROTECT — Cyber Security & Infrastructure Maintenance

We safeguard your digital assets from downtime, malware, and technical vulnerability:

- **Security Hardening & Malware Recovery:** Rapid isolation, cleanup, and hardening for compromised websites.
- **Managed Security & Infrastructure Retainers:** Daily malware scans, automated offsite backups, dependency updates, and 24/7 uptime monitoring.

03. GROW — Performance Marketing & Lead Automation

We convert traffic into measurable business revenue:

- **24/7 Lead Qualification & Response Systems:** Automated workflows that engage web leads within 60 seconds and route them directly to your sales team via WhatsApp and CRM.
- **ROI-Focused Performance Ads:** Data-driven Meta and Google Search campaigns focused on lowering Customer Acquisition Cost (CAC).

3. WHY CLIENTS TRUST RAFIy

- 1. **100% Asset & IP Ownership:** Upon final invoice settlement, you own 100% of your source code, domain, database, hosting accounts, and ad pixels.
- 2. **Transparent Scope & Fixed Milestones:** No hidden fees, surprise charges, or unapproved scope creep. Everything is documented in writing before work begins.
- 3. **Direct Communication:** Direct WhatsApp and phone channels with dedicated account management and clear Service Level Agreements (SLAs).

4. HOW WE WORK WITH YOU

Discovery Call > Custom Proposal & SOW > 30% Kickoff > Build & Staging Demo > 40% Milestone > Deployment & Handover (30%)

5. MASTER SERVICE LEVEL AGREEMENTS (SLAs)

t; Core SLA Rule (Response ≠ Resolution):				
t; Initial Response & Triage SLA governs how quickly our team acknowledges and begins technical diagnosis of an issue. Resolution times are target benchmarks dependent on technical issue complexity and third-party dependencies.				
Service Tier	Inquiry Acknowledgement	Incident Triage SLA	Progress Update Frequency	Target Resolution Window
	--- --- --- --- ---			
Standard Support	Within 24 Business Hours	Within 12 Business Hours	Every 24 Hours	48 Business Hours
Growth Retainer	Within 8 Business Hours	Within 4 Business Hours	Every 12 Hours	24 Business Hours
Enterprise SLA	Within 2 Business Hours	Within 1 Business Hour (24/7)	Every 6 Hours	8 Business Hours
Emergency Incident	Within 1 Hour (24/7)	Within 1 Hour (24/7 Hotline)	Every 2 Hours	4 Business Hours

6. TECHNICAL BENCHMARKS & COMPLIANCE OBJECTIVES

Target Infrastructure & Performance Benchmarks

- Note: The targets below represent standard operational objectives and best-effort engineering benchmarks, subject to third-party hosting infrastructure, client content volume, and external API dependencies.
- **Server Infrastructure:** High-speed cloud VPS / AWS instances with dedicated resource isolation.
 - **Uptime Objective:** Target 99.9% monthly uptime benchmark (excl. scheduled maintenance).
 - **Performance Benchmark:** Target load time < 1.5 seconds on standard mobile/desktop connections; Google Lighthouse Performance target score > 90.
 - **Security Benchmark:** Target A+ rating on SSL Labs testing; enforced TLS 1.3 encryption.

Regulatory & Data Protection Compliance

- Data handling strictly aligned with the **Indian Information Technology Act, 2000**.
- GDPR-compliant data processing & cookie privacy banners for European visitors.
- Regular vulnerability scans & quarterly audit reports for active retainers.

7. VERIFIED CASE STUDY BENCHMARKS (ILLUSTRATIVE EXAMPLES)

t; [Illustrative Example / Verified Benchmark Placeholder — Specific client identity details withheld pending NDA clearance]

- **Healthcare Clinic System:** Rebuilt legacy WordPress platform \$

→ Mobile load speed improved from 4.5s to 1.2s benchmark; qualified monthly inbound consultation bookings increased by 85%.

- **Commercial Real Estate Portal:** Emergency malware incident \$

→ Malicious scripts isolated, Google blacklist review submitted, and clean production restored within 4 hours.

- **D2C Fashion Store:** Storefront CRO rebuild \$

→ Mobile cart checkout friction reduced; checkout conversion rate improved by 35%.

8. FREQUENTLY ASKED QUESTIONS (FAQ)

Q: How long does a typical web project take from kickoff to launch?

A: Standard custom web projects are delivered within 4 to 6 weeks from kickoff, subject to content availability and prompt milestone approvals.

Q: Do I need to manage servers or technical details myself?

A: No. RAFly handles 100% of technical provisioning, server deployment, DNS configuration, and security configuration.

Q: What happens after the website is launched?

A: Every project includes a 30-day warranty period. Afterward, clients can transition to our Managed Security or Growth retainers.
